```
1   function relative_attractor(f::BoxMap, B::BoxSet)
2       for s in 1:steps
3           B = subdivide(B)
4           B = B ∩ f(B)
5       end
6       return B
7   end
```
